SUBJECT No. 21.

Improvement of major tanks and arrangement for their annual maintenance.

Messrs. T. Venkataswamaiya, Mysore District Board; Doraswami Iyengar, Chamrajnagar Taluk and Thimmaiya Gowda, Krishnarajpete Taluk.

Summary of Representation.—Major tanks in the State have been very much neglected, though Government are receiving a good income from the lands under them. The Government may investigate the possibility of raising the bund and sluices of these tanks and arrange for their annual repairs.

SUBJECT No. 22.

Enforcement of the Minor Tank Restoration Rules.

Mr. Belur Srinivasiengar, Bangalore Taluk.

Summary of Representation.—More attention is invited to the enforcement of Minor Tank Restoration Rules; particularly to Article 368 of the Mysore Revenue Manual, Vol. I, specially in view of the fact that estimates sanctioned, for instance in 1914, remain unexecuted. Prominence ought to be given to the heading of '*Minor Tank Restoration Works*' in the General Adminstration Reports.

SUBJECT No. 23.

Execution of earthwork to the tank bunds by Government.

Messrs. Veeregowda and Munisami Gowda, Dodballapur Taluk.

Summary of Representation.—The present system of allowing the raiyats to have the fishery and the pasturage of the tank in their village and requiring them to do the earthwork to the tank bund in return, is not working satisfactorily. Hence it is prayed that the Government may withdraw the above concession and arrange for the regular earth work being done to the tank bund.

SUBJECT No. 24.

Repairs to tanks in inam villages.

Mr. Karnik Krishnamurthi Rao, Magadi Taluk.

Summary of Representation.—The tanks in inam villages are in a very dilapidated condition. As the Government do not bestow any attention on them, the people and the cattle of such villages feel much difficulty for want of water. It is not known why the Government do not take interest in this respect. The inamdars are paying *kandayam* for their lands at a concession rate, it is therefore requested that the restrictions laid down for the repair of Government tank may extend to those in inam villages.

SUBJECT No. 25.

Arrangements for adequate water supply to the lands under channels.

Messrs. H. Krishna Sastry, Krishnarajpete Taluk and Lingegowda, Mysore Taluk.

Summary of Representation.—Proper arrangements may be made for adequate supply of water to the lands under channels by inserting pipes of proper sizes according to the class of lands that are to be irrigated. The present system is not working well.

SUBJECT No. 26.

Free hot weather supply in channels of the Kapila river.

Messrs. V. Bandiah, Nanjangud Taluk and P. Srinivasa Chetty, Nanjangud Municipality.

Summary of Representation.—The question of giving free hot weather supply in channels of the Kapila river may be favourably considered.
